## How Much Time It Takes for Flushable Wet Wipes to Biodegrade?

There are many type of wet wipes in the market, and also lots of confusion what allowed to flush and what is not. This reflect to problems with wastewater systems backup and pipe clogs.

The above indicate the time it takes for paper and wipes to biodegrade. The traditional toilet paper biodegrade after 45 sec, WipeMe® moist toilet paper biodegrade after 60 sec. All other solutions require much more time or event not biodegrade at all. WipeMe® present the next generation of moist toilet paper which is the most advance toilet paper in the market. It feels like toilet paper, function as a toilet paper, doesn't require changing any of the bathroom landscape and product is fully recyclable with unique packaging.
